**mySQL Oracle**  
**Firebase noSQL**  
**Git and Github**  
**Unix/Linux**  
**REST APIS**  
**Responsive Design**

## Profile

Hi, I'm a Computer Science graduate who loves building amazing experiences! Solving problems is what I do best whether its coding or helping my team win at board game nights.

## WORK EXPERIENCE

### Cloudspark Labs, Front End Developer

December 2020 - December 2021

- Developed new features for HR related flagship products released on Microsoft Teams store
- Coordinated flagship product 'Leave App' features with various teams to set expectations for product requirements, experience and feature implementation timelines
- Oversaw product quality assurance and effectively triaged bugs amongst the team to resolve them efficiently
- Architected the foundation for document based backend (Microsoft Azure Cosmos DB) that uses service buses (NestJS) for enterprise app that displays employee profile data

## PROJECTS

### Reel Vote

React Firebase Sass API HTML

Community movie voting app where users can login, put up to 5 movie nominations and view the top community results.

### PotatoHead

HTML Sass CSS jQuery/JavaScript

Toy Story inspired app that allows users to create and customize their own potato friend. All parts were made from DIV tags using CSS. (Turn on sound for best experience)
